Kubota

Service Excellence Award

We are one of the few Kubota dealers in the UK to have been awarded GOLD Standard for Service Excellence. Achieving this requires an indepth analysis by Kubota (UK) of all aspects of our business, to ensure our customer and product

support is of the highest standard

Tom from David Shillam Agricultural Contractors pleased to be taking delivery of the new tanker from Ben Manning of HIGHWOOD

Twelve months on from David Shillam Agricultural Contractors taking delivery of a new 3000G SlurryKat twin axle tanker, we ask David for his feedback...

“ I am particularly pleased with the tanker, specifically how well it travels loaded on the road. When off the road, Tom and I find the rear steering axle a massive bonus for manoeuvring around tight gateways and reducing footprint on wet ground even when loaded. Downtime is really important to me, so the fact I’ve never taken a spanner to it makes me very happy with my purchase. ”

M7002:

The powerful high performer

The Kubota M7002 is the high performer in the professional tractor market. With its extraordinarily powerful lift capacity and extensive potential for precision farming, the top model sets a whole new benchmark. Add to this first-class comfort and surprising operator convenience, efficient farming has never been this easy. Put its talents to use and reach top performance with ease.

Surprisingly powerful

All model variants with 130/150/170 hp, and 20/20/5 hp Power Boost option, demonstrate extraordinary dynamics and power.

Impressively environmentally friendly

The 6.1 L diesel engine with innovative SCR technology reduces emissions to a minimum and exceeds the current Stage IV Final emission standard.

Superbly versatile

The proven powershift transmission scores with its tremendous efficiency, and the continuously variable KVT transmission offers almost endless potential.

Exceptionally well arranged

The spacious cab provides boundless panoramic views with no blind spots, while the ergonomic seats and low cab noise ensure optimal comfort.

Astonishingly comfortable

The all-in-one terminal and multi-function lever are positioned optimally for ergonomics allowing intuitive control and easy monitoring of all machinery.

Impressively precise

100% ISOBUS-compatible, the M7002 supports the efficient use of operating equipment. The potential of its automatic steering system makes it a precision solution for effective agriculture.

M7002 series

130hp (150) | 150hp (170) | 170hp (175)

Kubota

M7002: The intelligent new standard

As the successor to Kubota's flagship tractor range; the new M7002 Series offers unique improvements and updates for enhanced productivity. The new range features Kubota's latest high performance, lower fuel consumption Euro Stage IV diesel engine, all new 6-speed Powershift transmission for faster and easier shifting and an impressive 11,500KG payload for heavier implement work. Intelligent improvements include new auto-steer functions, an enhanced headland management system, and a host of user friendly features including LED work lights, improved joystick control, enhanced suspension and a new air seat for unbeatable comfort and optimum productivity in the workplace.

MGX IV: Clever and multi-talented

The Kubota MGX IV is a clever all-rounder amongst professional tractors. Its modern engine technology makes a convincing case in tough field conditions with tremendous cost-efficiency and excellent environmental friendliness. It makes your work surprisingly easy and comfortable with its 8-gear powershift transmission, bi-speed turn steering system, and tremendously powerful hitch mechanism.

Amazingly powerful traction

The powerful and efficient 4-cylinder engines impress with high power, low engine speeds and fuel consumption, and long service life.

Surprisingly maneuverable

With its bi-speed turn steering system, the MGX IV has excellent maneuverability greatly simplifying front loader work.

Extremely environmentally friendly

The engines in this tractor series meet strict Stage IV Final emissions standards with confidence.

Impressively environmentally friendly

The 6.1 L diesel engine with innovative SCR technology reduces emissions to a minimum and exceeds the current Stage IV Final emission standard.

Outstanding equipment

The MGX IV is the only one in its class with an 8-speed powershift transmission for working comfortably with uninterrupted traction power.

Impressively precise

The MGX is much more than a tractor. With ISOBUS retrofit terminals and Kubota implements, it is the answer to any challenge. And with its potential for precision farming solutions, it saves time and money.

MGX IV Series

95 - 105 - 115 - 125 - 135

Powerful 4 cylinder 95-135hp turbo charged, intercooled engine with DOC, DPF, EGR & SCR to exceed Tier4f emission standards

User friendly 3range / 8speed power shift transmission

Kubota

MGX IV : The clever all rounder

The Kubota MGX IV has many talents – but the most impressive one is its uncompromising reliability. Perfectly matched with all Kubota implements and retro ISOBUS terminals, optimised for precision farming and adaptability.

THE SHELBOURNE POWERMIX PLUS HAS BEEN DESIGNED AS A COMPACT, TWIN AUGER RANGE OF VERTICAL DIET FEEDERS. MUCH OF THE DEVELOPMENT HAS BEEN DONE ON FARMS AND THE MAIN AIMS WERE TO MAKE THE MACHINE SHORTER AND MORE MANOEUVRABLE AS WELL AS IMPROVING BALE PROCESSING AND MIXING TIME AND QUALITY THROUGH A NEW TUB SHAPE, FIXED AND ELEVATING FRONT CONVEYOR MODELS ARE AVAILABLE

POWERMIX PLUS 22 TA	22 CU M	TANDEM SPRUNG AXLE	385/55 R22.5

The Powerspread Pro range is the culmination of 15 years of product development.

All of the traditional Powerspread benefits are incorporated such as overshot impeller, right side centre discharge and reverse drive facility with the added benefits of larger capacity, stronger, simpler drive system and a larger discharge rotor for increased discharge rates.

The Powerspread Pro is available in sizes of 1800 and 2300 gallons in short wheelbase format and 2400 and 3200 gallons in long wheelbase format with the latter capable of holding upto 15 tonnes of material. These machines are suitable for a wide range of farm, contractor and commercial waste disposal applications.

M5001:

The smart go-getter

The Kubota M5001 is the smart go-getter in its class - this very maneuverable professional tractor proves that true greatness comes from within. With its powerful engine, an excellent transmission, high ground clearance, and exceptionally simple operating controls, it quickly becomes indispensable for daily work. Put it to work and take care of tough jobs quickly.

Extremely powerful

The 4-cylinder engines with 95 and 113 hp (DIN 97/68 EC) have impressively reliable power and high efficiency.

Impressively environmentally friendly

Of course, the V3800 engine meets the strict requirements of the Stage IV Final emission standard.

Amazingly comfortable

With its 36 forward and 36 reverse gears, the M5001 shifts extremely easily and comfortably.

Extremely maneuverable

The front axle bevel-gear with greater all around manoeuvrability and higher ground clearance make the M5001 extremely agile and maneuverable.

Surprisingly comfortable

The comfortable and generous cab provides an optimal panoramic view. Thanks to the clear arrangement of all control elements, not a movement is wasted.

Impressively precise

The M5001 is much more than a tractor. With ISOBUS retrofit terminals and Kubota implements, it is the answer to any challenge. And with the potential of precision farming solutions, it saves time and money.
